Jive Voice Applications

Take your phone system to the next level

Jive Mobile. iOS and AndroidOS softphone application that allows you to bring your business number - talk and text - to any device, anywhere.

Jive View / Jive Business Continuity. Monitor voice network in real-time. Deliver emergency failover and preserve station-to-station dialing even during an Internet outage.

Jive Web. Web-based softphone application that eliminates the need for a desktop handset. Features full system functionality, business SMS, and presence awareness.

Jive Contact Center with Call Analytics. Gain valuable insights into customer voice communications. Implement a light contact center solution to meet business needs at a fraction of the cost.

Connect PRO Bundle. Add the industry's best video conferencing tool - add a GoToMeeting PRO license to any Jive seat.

Jive SD-WAN. Guarantee enterprise-grade features, quality of service, and security for all of your customers' locations using less expensive broadband connections
